

ebikemotion®

Dealer's Smartphone & Web APP

Next generation of tools for your commercial & technical force

Diagnosis
Status &
Activation
Process

We have created one APP for the Dealers side in order to activate or make diagnosis of the bike using Bluetooth® and a simple Smartphone complemented with a Web Back Office system to give to your commercial and technical force simple access to the status of the bike for doing important operations like activating or deactivating the e-bike, updating and getting detailed information of the system by using special engineering modes.

Now your product is more accessible, more reliable and more secure in your commercial transactions. When you build a new e-bike we give to you connected tools to include in automatic way part numbers of the components of the e-bike supported by ebikemotion®. This information is linked with the chassis number of the e-bike creating a unit that could be accessible by you and your dealer.

Simple operations like check the status of one e-bike or complex like a firmware update, now are very close to your dealer network that will only need one compatible smartphone with Bluetooth® to do everything.

Target Applications:

- e-bike Status
- Remote Diagnostic
- Performance analysis
- Dealer network loyalty
- e-bike Tracking & Recovering
- Marketing One2One

HEADQUARTERS

Marketing One2One and user loyalty tools based on the information that the Dealer APP collects of ebikemotion devices will give to you a new opportunity of business improving also your aftersales service with a deep knowledge of the evolution and aging of your product

Keep your users
connected
to your
commercial and
technical force

The dealer is the key of the market, which is one premise that you as Manufacturer knows very well. Attending to this priority, the Dealer's APP is a tool that will convert the Dealer in something important in the aftersales service. You will know in detail the date of activation of your e-bikes, when one has been stolen, you will give support to your users to recover them just using your commercial force and an Smartphone.
