There are many bicycle riders that use the smartphone only to record the track with the rest of the information around it like positions, speed, heart rate, cadence, altitude, etc. in order to analyze later at home and later share the data with other users. Other ones, prefer plan the activities using the Personal Computer or the tablet because the size of the screen is bigger and the connection faster. For all of them we have created the user’s dashboard website, that offer all the information and even new functions that has more sense to manage by the computer.

ebikemotion® Web Dashboard is a WEB SITE that put together all your activity information in combination with your e-bike information and combines even with third platforms as STRAVA®, Facebook® or Twitter®.

Keep your users connected to you

By offering a FREE premium APP and dashboard cycling website to your users, you will get a direct connection to your product and to you users. The best Support for your e-bikes and Marketing tool for Marketing OneToOne with them.

By the user’s dashboard the e-bike rider will have in any computer connection to his or her e-bike. Battery and e-bike status, diagnostic, errors, ordering support, On-line manual, tutorials, videos and a complete tool to analyze the activities done in the e-bike for improving the next one.

At the same time you will get a user connection and we offer Marketing One2One tools to create marketing campaigns, create banners, etc. filtering the dashboard information.

Included software platforms:

- STRAVA
- Facebook
- Ebikeemotion

Any third party trademarks or service marks displayed on the document are the property of their respective owners.
